SUMMARY

I'm a Computer Science Engineering student with hands-on experience in SOC operations, VAPT, and penetration testing. Skilled in log analysis and incident investigation, along with phishing analysis and basic malware investigation. Experienced in recon, web application testing, and vulnerability exploitation through hands-on labs. I'm actively improving my skills through practical labs and real-world scenarios, with a goal of building a career in digital forensics.

EDUCATION

B.E. in Computer Science Engineering

P A College Of Engineering, GPA: 8.5

Nadupadav, Montepadav post, Kairangala, Mangalore- 574153

Graduation: August 2027

P.U.C

S.T Aloysius pu college, Mark-83.3%

Kodialbail, Mangalore-575003

CERTIFICATIONS

- **Google Cyber Security Certificate:** Includes Linux, MySQL, and Python hands-on labs.
 - **SOC Analyst Learning Path:** Completed Hands-on Tier 1 SOC training in phishing analysis, web attack detection, basic malware analysis, and MITRE ATT&CK.
 - **Incident Responder Learning Path:** Completed hands-on training in incident detection, analysis, IOC investigation, and containment using real-world SOC scenarios.
-

PROJECTS/PRACTICAL EXPERIENCE

Malware Incident Analysis – VBScript Investigation (Lets Defend Sandbox)

- Monitored and analyzed security alerts from SIEM and log sources to identify real threats
- Investigated phishing emails, web attacks, and malware-related alerts in simulated SOC environments
- Performed endpoint and network analysis using Windows tools to validate suspicious activity
- Conducted IOC investigation and supported containment actions based on findings
- Documented incidents and investigation notes following SOC reporting practices

Memory Forensics & Incident Investigation (Windows) – (Lets Defend Sandbox)

- Analyzed Windows memory dump to identify suspicious processes and signs of compromise
 - Differentiated normal system behavior from attacker activity using alerts and process analysis
 - Investigated malicious artifacts from memory and identified attacker tooling (winPEAS.exe)
 - Confirmed impacted user account and potential credential exposure
 - Documented findings in a clear incident report for technical and non-technical stakeholders
-

TECHNICAL SKILLS

- **Security & SOC:** SIEM Monitoring, Alert Triage, Log Analysis, Incident Response, Malware Analysis, Phishing Investigation
 - **Tools:** Splunk, Autopsy, Wireshark
 - **Programming:** Python
 - **Database:** MySQL
-

ACHIEVEMENTS

- Won 2nd Prize in College Mini Project Competition for the project “Phishing Simulation, Splunk Dashboard & Mobile Forensics.”
